Key Features: Perpetual License /// For Educational Institutions Only /// Web-Based Management Console /// Create User Groups /// Pre-Install and Block Apps /// Control User Access /// Configure Network Access /// Generate Reports /// Customize User Features

Product Description

Chromebooks have a web-based management console that makes it easy for you to deploy and centrally manage a fleet of Chrome devices and users.

With just a few clicks, the management console allows you to:

Create user groups

Apply policies, apps, and settings to different sets of users. Group students by grade level or subject. Separate students and faculty.

Pre-install and block apps

Blacklist (block), whitelist, or pre-install apps, extensions and websites.

Track assets

Assign devices to specific students and faculty and get configuration and usage reports.

Manage user access

Control who uses your Chrome devices: prevent outside users from logging in, disable Guest Mode, or designate specific types of users (like teachers) who can sign in to a device.

Control network access

Define network and proxy settings to make it easy for students to get up and running and ensure they're protected by web filters and firewalls.

Customize user features

Modify student settings like bookmark and app sync across computers, and show some school spirit on your devices with custom Chrome desktop themes.
